Subject: The Huckleberry Bay Company, Reuse Permit LA-000113-03, Minor Permit Modification No. 2

Dear Mr. Fiedler:

This letter is a notification regarding a modification to the Huckleberry Bay Company Permit LA-000113-03 issued by the Idaho Department of Environmental Quality (DEQ) on March 1, 2010. Your permit is currently scheduled to expire on March 1, 2016. This modification, referred to as Modification 2, extends the permit expiration date by two (2) years. With the issuance of this modification, the Huckleberry Bay Company is permitted to continue operating the wastewater reuse system under the terms and conditions of the current permit until March 1, 2018.

Per IDAPA 58.01.17.700, a modification may be initiated by DEQ in the event of a change to standards or regulations after the permit was issued. In 2011, IDAPA 58.01.17 (Recycled Water Rules) were changed to allow DEQ to issue permits for up to 10 years. Per the Recycled Water Rules, this modification is considered a minor modification; therefore, no public comment period is necessary.

Annual reports and monitoring data from the Huckleberry Bay Company recycled water system demonstrate substantial compliance with Permit LA-000113-03. Permit LA-000113-03 allows the Huckleberry Bay Company to irrigate up to 3.12 million gallons per year on 4.6 acres. Hydraulic loading has ranged between 1.86 and 1.97 million gallons through the duration of this permit. Permit LA-000113-03 also sets a maximum nitrogen loading limit of 136 lbs/acre-year; annual nitrogen loading has ranged from 20.9 to 59.2 lbs/acre-year. Allowing the Huckleberry Bay Company to continue operating the reuse facility in compliance with their permit for the two (2) additional years will not pose any increased risk to human health or the environment.

Please note that the dates of the compliance activities listed in the permit will not change. All monitoring and reporting requirements, including submittal to DEQ of an annual site performance report, remain unchanged by this permit modification and applies to the permit extension period.

The attached document, Modification "2," serves as the modification to the expiration date of Reuse Permit LA-000113-03. This appendix must be attached to the permit. Should you have any questions regarding this permit modification, please contact Matt Plaisted at (208) 666-4622.

Sincerely,

Daniel Redline
Regional Administrator
