

DEQ - AIR QUALITY PROGRAM PERMIT BY RULE (PBR) REGISTRATION For Nonmetallic Mineral Processing Plants

PBR REGISTRATION OVERVIEW

Any owner or operator of a nonmetallic mineral processing plant (rock crushing plant) that opts to operate under a PBR needs to meet all the requirements set forth in Sections 795–799 of IDAPA 58.01.01, *Rules for the Control of Air Pollution in Idaho (Rules)*. These rules include requirements to use best management practices and specifies monitoring and recordkeeping. The *Rules* can be accessed through the DEQ website http://www.deq.idaho.gov/rules/admin_rules.cfm#links. When registered with a PBR, a Permit to Construct is not required.

Rock crushing plants that operate or may be operated at a single location or site for more than twelve (12) consecutive months do not qualify for a PBR and must obtain a permit. The Permit to Construct application for rock crushers can be obtained from the DEQ website http://www.deq.idaho.gov/air/permits_forms/forms/forms.cfm.
