RE: Non-Municipal Solid Waste Management Facility Design Plan Approval Application
(Revised July 5, 2012 and August 20, 2012)
Proposed Renewable Energy Project Located At Ada County Landfill
DEQ Completeness Determination
DEQ Approval of Design Application

Dear Mr. Pergande:

On May 18, 2012, the Department of Environmental Quality (Department) received a design plan approval application for a Tier II Waste to Energy Facility to be located within Ada County Property adjacent to the Hidden Hollow Landfill in Ada County, Idaho. On July 5, 2012 and August 20, 2012, the Department received revised applications including supporting documentation in regards to the proposed facility. Based on the design application and supporting documentation, the Department finds that the design application is complete.

In addition, after review of the materials, the Department has determined that the proposed design complies with the applicable Tier II incinerator design requirements, outlined in the Department's Solid Waste Management Rules (Rules), IDAPA 58.01.06, and is hereby approved.

Please be advised that any changes to the design components regulated under these rules must be submitted to DEQ for review/approval prior to implementation. Within 30 days of completion of construction, a registered engineer in the State of Idaho must submit a written certification to DEQ stating that the facilities were constructed in accordance with the approved design.

Also, please note that the approval of the design application is valid for two years from the date of this letter. The Department's approval shall become invalid if the owner and operator fail to begin construction within two years from the date of this letter, or if after construction has begun; work is suspended for more than two years. Owners and operators may apply for

an extension provided that the written request is received by the Department no less than one month prior to expiration of this approval.

If you have any questions or further information to present, please contact me at (208) 373-0599.

Sincerely,

Jack M. Gantz, P.E.
Technical Engineer I
