A.0 RCRA Hazardous Waste Part A Permit Application

As part of the RCRA Part B Permit Renewal Application for US Ecology Idaho, Inc. (USEI), the RCRA Hazardous Waste Part A Permit Application has been updated as required under the Permit Application process. This Section defines the processes to be used for the treatment, storage, and disposal of hazardous wastes; the design capacity of such processes; and the specific hazardous wastes to be handled at the USEI Site "B" treatment, storage, and disposal facility (TSDF) in Owyhee County, Idaho. These forms are being submitted consistent with IDAPA 58.01.05.012 (40 CFR 270.10 and 40 CFR 270.13). The RCRA Hazardous Waste Part A Permit Application consists of two forms included in the US EPA Part A Form (USEPA Form 8700-23): the RCRA Subtitle C Site Identification Form and the Hazardous Waste Permit Identification Form.

A.1 RCRA Subtitle C Site Identification Form

The "RCRA Subtitle C Site Identification (Site ID) Form" has been updated as required under the Permit Application process. US EPA Part A Form (USEPA Form 8700-23), dated December 2011 was utilized and provides updated site specific information for items that have changed and verifies information for those items that remain unchanged. The Site ID Form is included in Appendix A.1 of this section.

A.2 Hazardous Waste Permit Information Form

The "Hazardous Waste Permit Information Form" has been updated as required under the Permit Application process. U.S. EPA Part A Form (USEPA Form 8700-23), dated December 2011, was utilized and includes the current and proposed hazardous waste management activities. The "Hazardous Waste Permit Information Form" (HWPIF), was completed in accordance with applicable instructions for the form, and is included in Appendix A.1 of this section. Additional information required by this form is included as follows:

- "Item 7 - Process - Codes and Design Capacities" are identified in Section A.2.1.
- "Item 8 – Other Treatment Processes" are identified in Section A.2.2;
- "Item 9 – Description of Hazardous Wastes" are identified in Section A.3;
- "Item 10 – Map" is described in Section A.2.4 and shown on Figure A-1;
- "Item 11 – Facility Drawing" is described in Section A.2.5 and shown on Figure A-2; and
- "Item 12 – Photographs" is described in Section A.2.6 and shown on Figure A-3 and A-4.

A.2.a HWPIF - "Item 7 - Process - Codes and Design Capacities"

The following process code descriptions are provided to clarify the codes listed in Item 7 of the HWPIF, and to describe all processes that will be used to treat, store, or dispose of hazardous waste at this facility.

- Code D80 - Landfill Disposal;
- Code D83 - Surface Impoundment Disposal;
- Code S01 - Container Storage including Container Storage Areas 4, 5, and 7;
- Code S02 - Tank Storage;
- Code S04 - Surface Impoundment Storage;
- Code S06 - Containment Building Storage includes the storage of hazardous waste materials in the sort floors, oversized material bin, ancillary staging areas, Mixing Bin Tanks, or RCRA containers within the Containment Building;
- S099 – Other Storage including the Container Storage Area;
- Code T01 - Tank Treatment;
- Code T02 - Surface Impoundment Treatment;

- Code T04 - Other Treatment including treatment in containers; and
- Code T94 - Containment Building Treatment.

In addition to these process codes, the design capacity of each process is provided as part of the description using appropriate units of measure. The design capacity for the landfill units are indicated as total design capacity of the landfill unit, along with the remaining, unused capacity of the landfill unit. Each process listed in Item 7 of the HWPIF is identified on the facility drawing (Figure A-2), and annotated aerial photograph (Figure A-4).

A.2.b HWPIF - "Item 8 - Other Processes"

The following process descriptions are provided as required to meet the instructions for Code T04 - Other Treatment, and to identify processes that will be used for which a code is not contained in Item 7 of the HWPIF. These additional processes include process codes are as follows:

- Code T04 - Other Treatment in containers.
- Code S099 – Other Storage including the Container Storage Area 1.

In addition to these other process codes, the design capacity of each process is provided as part of the description. Each process listed in Item 8 of the HWPIF is identified on the facility drawing (Figure A-2), and annotated aerial photograph (Figure A-4).

A.2.c HWPIF - "Item 9 - Description of Hazardous Wastes"

Each four (4) digit number from IDAPA 58.01.05.005 (40 CFR, Part 261, Subpart D) of each listed hazardous waste that will be handled is included. For hazardous wastes which are not listed in IDAPA 58.01.05.005 (40 CFR, Part 261, Subpart D), each four digit number from IDAPA 58.01.05.005 (40 CFR, Part 261, Subpart C) that describes the characteristics and/or toxic contaminants of those hazardous wastes have been included. Page 5 of 6 of the HWPIF has been reproduced to identify all of the hazardous waste codes handled at the facility, and is located in Appendix A.2.

The estimated annual quantity of waste to be handled for each listed waste and for each characteristic or toxic contaminant has identified for each individual line in Item 9 of the Part A. The process codes for listed hazardous waste and for characteristic hazardous waste have been included on each line of Item 9 of the Part A. These codes are "S01", "S02", and "000", where "000" is defined on the second line of column D(2) of Item 9 for all lines of Item 9 of the Part A using the codes identified in paragraphs A.2.a and A.2.b of this Section.

The Process Codes and Design Capabilities provide the general process and location of the processes. The specific technologies utilized (e.g., stabilization, chemical oxidation, etc.) are defined in more detail in Section C and D of this Part B Application.

A.2.d HWPIF - "Item 10 - Map"

A topographic map of the area extending 1 mile beyond the property boundaries of the facility is included as Figure A-1. The map shows the following information:

- The boundaries of the facility and contiguous property;
- All discharge structures, springs, and surface water bodies in the area, plus all drinking water wells within ¼ mile of the USEI facility which are identified by public records or known by USEI;

Due to the scale of the topographic map the following information is shown on Figure A-2:

- The legal boundaries of the facility;
- Existing discharge structures;
- All hazardous waste management facilities; and
- Location of all processes listed in Items 8 and 9 of the Part A, identified by process code.

A.2.e HWPIF – "Item 11 - Facility Drawing"

Since USEI's Site B is an existing facility, a drawing showing the general layout of the facility is included as Figure A-2. The facility drawing shows the following information:

- The legal boundaries of the facility and contiguous property;
- The name of each operation;
- Areas of past storage, treatment, or disposal operations;
- Areas of future storage, treatment, or disposal operations; and
- The approximate dimensions of the property boundaries and all storage, treatment, and disposal areas, identified by process codes of the Part A, to indicate the location of each unit.

A.2.f HWPIF – "Item 12 – Photographs"

The photographs of US Ecology Idaho, Inc.'s (USEI) Site B RCRA treatment, storage and disposal facility are included as Figures A-3 and A-4. These photographs taken in 2003 have been annotated to delineate pre-RCRA units, existing structures, existing management units for treating, storing or disposing hazardous waste materials, and proposed management units for treatment, storage, or disposal operations. For detailed information of pre-RCRA units, existing structures, existing management units for treating, storing or disposing hazardous waste materials, or proposed management units for treatment, storage, or disposal operations see Figure A-2 or Sections B, D and J of this Part B Application.

A.2.f.(1) Description of Photographs

The photograph included as Figure A-4 is the same photograph as Figure A-3, but the photograph has been annotated to included delineation of pre-RCRA units, existing structures, existing management units for treating, storing or disposing hazardous waste materials, and proposed management units for treatment, storage, or disposal operations.

9. Description of Hazardous Wastes - Enter Information in the Sections on Form Page 5

A. EPA HAZARDOUS WASTE NUMBER – Enter the four-digit number from 40 CFR, Part 261 Subpart D of each listed hazardous waste you will handle. For hazardous wastes which are not listed in 40 CFR, Part 261 Subpart D, enter the four-digit number(s) from 40 CFR Part 261, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.

B. ESTIMATED ANNUAL QUANTITY – For each listed waste entered in Item 9.A, estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in Item 9.A, estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

C. UNIT OF MEASURE – For each quantity entered in Item 9.B, enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS	P	KILOGRAMS	K
TONS	T	METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure, taking into account the appropriate density or specific gravity of the waste.

D. PROCESSES

1. PROCESS CODES:

For listed hazardous waste: For each listed hazardous waste entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all listed hazardous wastes.

For non-listed waste: For each characteristic or toxic contaminant entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

NOTE: THREE SPACES ARE PROVIDED FOR ENTERING PROCESS CODES. IF MORE ARE NEEDED:

1. **Enter the first two as described above.**
2. **Enter "000" in the extreme right box of Item 9.D(1).**
3. **Use additional sheet, enter line number from previous sheet, and enter additional code(s) in Item 9.E.**

2. PROCESS DESCRIPTION: If code is not listed for a process that will be used, describe the process in Item 9.D(2) or in Item 9.E(2).

NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER – Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

1. **Select one of the EPA Hazardous Waste Numbers and enter it in Item 9.A. On the same line complete Items 9.B, 9.C, and 9.D by estimating the total annual quantity of the waste and describing all the processes to be used to store, treat, and/or dispose of the waste.**
2. **In Item 9.A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In Item 9.D.2 on that line enter "included with above" and make no other entries on that line.**
3. **Repeat step 2 for each EPA Hazardous Waste Number that can be used to describe the hazardous waste.**

EXAMPLE FOR COMPLETING Item 9 (shown in line numbers X-1, X-2, X-3, and X-4 below) – A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operations. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

Attach to this application a topographical map, or other equivalent map, of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all spring, rivers, and other surface water bodies in this map area. See instructions for precise requirements.

11. Facility Drawing

All existing facilities must include a scale drawing of the facility (see instructions for more detail).

12. Photographs

All existing facilities must include photographs (aerial or ground-level) that clearly delineate all existing structures; existing storage, treatment, and disposal areas; and sites of future storage, treatment, or disposal areas (see instructions for more detail).
