## Acronyms, Units, and Chemical Nomenclatures

AFS	AIRS Facility Subsystem
AIRS	Aerometric Information Retrieval System
AQCR	Air Quality Control Region
CO	carbon monoxide
DEQ	Department of Environmental Quality
EPA	U.S. Environmental Protection Agency
HAPs	Hazardous Air Pollutants
IDAPA	a numbering designation for all administrative rules in Idaho promulgated in accordance with the Idaho Administrative Procedures Act
MACT	Maximum Achievable Control Technology
NESHAP	National Emission Standards for Hazardous Air Pollutants
NO <sub>x</sub>	nitrogen oxides
NSPS	New Source Performance Standards
PT	particulate matter
PM <sub>10</sub>	particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers
PSD	Prevention of Significant Deterioration
PTC	permit to construct
SIP	State Implementation Plan
SM	synthetic minor
SO <sub>2</sub>	sulfur dioxide
T/yr	tons per year
UTM	Universal Transverse Mercator
VOC	volatile organic compound

## 1. PURPOSE

The purpose for this memorandum is to satisfy the requirements of IDAPA 58.01.01.200, Rules for the Control of Air Pollution in Idaho, for issuing permits to construct.

## 2. FACILITY DESCRIPTION

Boise Building Solutions Manufacturing is a timber and wood products facility. The Standard Industrial Classification for the specialty lumber portion of the facility is 2421, which refers to establishments primarily engaged in sawing rough lumber, timber form logs, bolts, or resawing cants and flitches into lumber. This includes box lumber and softwood cut stock, planing mills combined with sawmills, and separately operated planing mills which are engaged primarily in producing surfaced lumber and standard workings or patterns of lumber.

## 3. FACILITY / AREA CLASSIFICATION

The facility is classified as a synthetic minor facility because, without permit limits on the potential to emit, emissions of criteria pollutants (PM<sub>10</sub>, CO, NO<sub>x</sub>, SO<sub>2</sub>, lead, and ozone) could exceed 100 tons per year. The AIRS classification is "SM" because the potential to emit of criteria pollutants is below major source levels.

The facility is located within AQCR 63 and UTM zone 11. The facility is located in Gem County which is designated as attainment or unclassifiable for all criteria pollutants.

The AIRS information provided in Appendix A defines the classification for each regulated air pollutant at the facility. This required information is entered into the EPA AIRs database.

## 4. APPLICATION SCOPE

The facility has requested a name change and change in ownership from Boise Cascade Corporation to Boise Building Solutions Manufacturing, L.L.C.

### 4.1 *Application Chronology*

October 5, 2004	DEQ received application.
November 3, 2004	DEQ determined application complete.

## 5. PERMIT ANALYSIS

This section of the Statement of Basis describes the regulatory requirements for this PTC action.:

### 5.1 *Equipment Listing*

No equipment changes are associated with this permitting action.

### 5.2 *Emissions Inventory*

There is not an increase emissions associated with this permitting action. Therefore, an emissions inventory is not required.

### **5.3 Modeling**

A modeling analysis is not required for this permitting action because there is not an increase in emissions.

### **5.4 Regulatory Review**

This section describes the regulatory analysis of the applicable air quality rules with respect to this PTC.

IDAPA 58.01.01.209.04 ..... Revisions to Permits to Construct

This rule establishes the requirements for permit revisions. Because emissions are not increasing, a public comment period is not required.

### **5.5 Fee Review**

A PTC processing fee is not required for a facility name change/change of ownership.

## **6. PERMIT CONDITIONS**

No changes in permit conditions are associated with the permitting action. To clarify the existence of emission limits on Cyclone 22 which is controlled by Baghouse BH1, the emission limits exists for Cyclone 22 to account for maintenance operations which are not controlled by Baghouse BH1. The limit was established by the PTC issued January 3, 2002.

## **7. PUBLIC COMMENT**

The change in name and ownership does not require a public comment period

## **8. RECOMMENDATION**

Based on review of application materials, and all applicable state and federal rules and regulations, staff recommend that Boise Building Solutions Manufacturing, L.L.C. be issued a final PTC No. 040032 for the change in name and ownership of the facility. No public comment period is required, no entity has requested a comment period, and the project does not involve PSD requirements.

ABC/sd            Permit No. P-040032

## **APPENDIX A**

### **AIRS/AFS FACILITY-WIDE CLASSIFICATION DATA ENTRY FORM**

# AIRS/AFS<sup>a</sup> FACILITY-WIDE CLASSIFICATION<sup>b</sup> DATA ENTRY FORM

**Facility Name:** Boise Building Solutions Manufacturing, L.L.C.  
**Facility Location:** Emmett  
**AIRS Number:** 045 - 00001

AIR PROGRAM								AREA CLASSIFICATION
POLLUTANT	SIP	PSD	NSPS (Part 60)	NESHAP (Part 61)	MACT (Part 63)	SM80	TITLE V	A-Attainment U-Unclassified N- Nonattainment
SO <sub>2</sub>	B							U
NO <sub>x</sub>	B							U
CO	B							U
PM <sub>10</sub>	SM						SM	U
PT (Particulate)	SM						SM	U
VOC	B							U
THAP (Total HAPs)	B							U
			APPLICABLE SUBPART					

<sup>a</sup> Aerometric Information Retrieval System (AIRS) Facility Subsystem (AFS)

<sup>b</sup> AIRS/AFS Classification Codes:

- A = Actual or potential emissions of a pollutant are above the applicable major source threshold. For HAPs only, class "A" is applied to each pollutant which is at or above the 10 T/yr threshold, or each pollutant that is below the 10 T/yr threshold, but contributes to a plant total in excess of 25 T/yr of all HAPs.
- SM = Potential emissions fall below applicable major source thresholds if and only if the source complies with federally enforceable regulations or limitations.
- B = Actual and potential emissions below all applicable major source thresholds.
- C = Class is unknown.
- ND = Major source thresholds are not defined (e.g., radionuclides).
