Subject: Approval with Changes of A Class 3 Permit Modification Request for the HWMA/RCRA Storage and Treatment Permit for the INTEC Liquid Waste Management System on the Idaho National Laboratory (INL,)

Dear Ms. Hernandez:

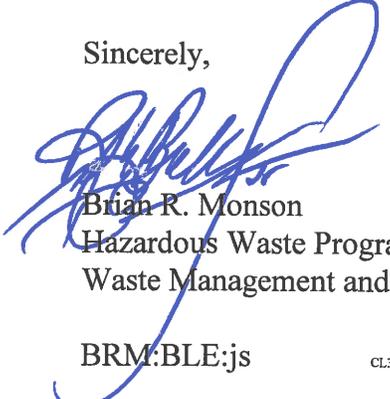

This letter transmits the approval of the Class 3 Permit Modification to the Idaho Nuclear Technology and Engineering Center (INTEC) Liquid Waste Management System (ILWMS) located on the Idaho National Laboratory (EPA ID Number ID48900008952).

The permit modification addresses engineering and operational changes to the Integrated Waste Treatment Unit (IWTU) component of the permit as well as making minor administrative changes to the permit. The facility first requested this modification on November 30, 2012. DEQ determined the modification was incomplete and requested additional information. DEQ received the required supplemental information on March 21, 2013. A draft permit was prepared and a 45 day comment period was opened on June 28, 2013. The comment period closed on August 12, 2013 with one set of comments received and no requests for a public hearing. A second set of comments was received several days after the close of the comment period. In accordance with IDAPA 58.01.05.012 [40 CFR § 270.42)], DEQ hereby approves the Class 3 modification request with changes. The specific change to the permit is described in the enclosed Response to Comments.

In accordance with IDAPA 58.01.05.013 [40 CFR § 124.15] the modified permit will be effective October 15, 2013 unless appealed in accordance with IDAPA 58.01.05.013 [40 CFR § 124.19]. The Temporary Authorization for Construction terminates on the effective date of the modified permit.

If you have any questions regarding this matter, please contact Brian English at (208) 373-0425.

Sincerely,

Brian R. Monson
Hazardous Waste Program Manager
Waste Management and Remediation Division
