Challis, Idaho 83226

RE: Facility ID No. 037-00008, Challis Redi-Mix, Challis
Final Tier II Operating Permit Letter

Dear Ms. Robinson:

The Department of Environmental Quality (DEQ) is issuing Tier II Operating Permit No. T2-2008.0156 to Challis Redi-Mix located at Challis for a transfer of ownership, in accordance with IDAPA 58.01.01.400 through 406, Rules for the Control of Air Pollution in Idaho (Rules).

The enclosed Tier II operating permit is based on the information contained in your permit application. This Tier II permit is effective immediately and replaces your previous permit issued on February 14, 2008, the terms and conditions of which no longer apply. This permit does not release Challis Redi-Mix from compliance with all other applicable federal, state, or local laws, regulations, permits, or ordinances. Please note that this permit expires five years after the issuance date.

In order to fully understand the compliance requirements of this permit, DEQ highly recommends that you schedule a meeting with Maria Miles, Regional Air Quality Analyst, at 208-528-2650 to review and discuss the terms and conditions of this permit. Should you choose to schedule this meeting, DEQ recommends the following representatives attend the meeting: your facility's plant manager, responsible official, environmental contact, and any other staff responsible for day-to-day compliance with permit conditions.

Pursuant to IDAPA 58.01.23, you, as well as any other entity, may have the right to appeal this final agency action within 35 days of the date of this decision. However, prior to filing a petition for a contested case, I encourage you to contact Shawnee Chen at 208-373-0502 or shawnee.chen@deq.idaho.gov to address any questions or concerns you may have with the enclosed permit.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Simon".

Mike Simon

Concrete and aggregate sales

8. PERMIT AUTHORITY

This permit is issued according to the Rules for the Control of Air Pollution in Idaho, IDAPA 58.01.01.400 through 410, and pertains only to emissions of air contaminants regulated by the state of Idaho and to the sources specifically allowed to be operated by this permit.

This permit has been granted on the basis of design information presented with its application. Changes in design, equipment or operations may be considered a modification. Modifications are subject to DEQ review in accordance with IDAPA 58.01.01.200 through 228 of the Rules for the Control of Air Pollution in Idaho.

1. TIER II OPERATING PERMIT SCOPE

Purpose

- 1.1 This permitting action is for a Tier II operating permit revision for the ownership change to the facility. [12/17/08]
- 1.2 This Tier II operating permit replaces the following permit, the terms and conditions of which shall no longer apply:
 - Tier II Operating Permit No. T2-2007.0225, issued February 14, 2008. [12/17/08]

Regulated Sources

1.3 Table 1.1 lists all sources of regulated emissions in this permit.

Table 1.1 SUMMARY OF REGULATED SOURCES

Permit Section	Source Description	Emissions Controls
2, 3	<p>Concrete batch plant – transit mix</p> <p>Manufacturer: BINABATCH Model: unknown Maximum capacity: 40 cy/hr Maximum production: 84,000 lb/day cement input</p>	<p>Cement storage silo fabric sock</p> <p>Manufacturer: Dickle Equip Model: unknown Estimated control efficiency: 75%</p>
2, 3	<p>Generators</p> <p>(screening operation)</p> <p>Manufacturer: Lister genset Model: 4101040TX3A001 Maximum capacity: 10 HP Maximum production: 4,500 hr/yr</p> <p>(washing operation)</p> <p>Manufacturer: Caterpillar Model: 3304 genset Maximum capacity: 125 kW Maximum production: 4,500 hr/yr Fuel: Diesel Fuel consumption: 9 gal/hr</p>	None None
2	<p>Screening operation</p> <p>Date of construction: 1978 Maximum capacity: 15 T/hr</p> <p>Materials transfer points (includes fugitives)</p>	<p>Water sprays or equivalent</p> <p>Estimated control efficiency: 75%</p>

2. FACILITY-WIDE CONDITIONS

Fugitive Emissions

- 2.1 All reasonable precautions shall be taken to prevent PM from becoming airborne in accordance with IDAPA 58.01.01.650-651. In determining what is reasonable, consideration will be given to factors such as the proximity of dust-emitting operations to human habitations and/or activities and atmospheric conditions that might affect the movement of particulate matter. Some of the reasonable precautions include, but are not limited to, the following:
- Use, where practical, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of lands.
 - Application, where practical, of asphalt, oil, water, or suitable chemicals to, or covering of, dirt roads, material stockpiles, and other surfaces which can create dust.
 - Installation and use, where practical, of hoods, fans, and fabric filters or equivalent systems to enclose and vent the handling of dusty materials. Adequate containment methods should be employed during sandblasting or other operations.
 - Covering, where practical, of open-bodied trucks transporting materials likely to give rise to airborne dusts.
 - Paving of roadways and their maintenance in a clean condition, where practical.
 - Prompt removal of earth or other stored material from streets, where practical.
- 2.2 The permittee shall monitor and maintain records of the frequency and the method(s) used (i.e., water, chemical dust suppressants, etc.) to reasonably control fugitive emissions.
- 2.3 The permittee shall maintain records of all fugitive dust complaints received. The permittee shall take appropriate corrective action as expeditiously as practicable after receipt of a valid complaint. The records shall include, at a minimum, the date that each complaint was received and a description of the following: the complaint, the permittee's assessment of the validity of the complaint, any corrective action taken, and the date the corrective action was taken.
- 2.4 Each day that the facility is operated, the permittee shall conduct a facility-wide inspection of potential sources of fugitive emissions, during daylight hours and under normal operating conditions to ensure that the methods used to reasonably control fugitive emissions are effective. If fugitive emissions are not being reasonably controlled, the permittee shall take corrective action as expeditiously as practicable. The permittee shall maintain records of the results of each fugitive emissions inspection. The records shall include, at a minimum, the date of each inspection and a description of the following: the permittee's assessment of the conditions existing at the time fugitive emissions were present (if observed), any corrective action taken in response to the fugitive emissions, and the date the corrective action was taken.

Odors

- 2.5 The permittee shall not allow, suffer, cause, or permit the emission of odorous gases, liquids, or solids to the atmosphere in such quantities as to cause air pollution.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-2008.0156

Permittee:	Challis Redi-Mix	Facility ID No. 037-00008
Location:	Challis, Idaho	

2.6 The permittee shall maintain records of all odor complaints received. If the complaint has merit, the permittee shall take appropriate corrective action as expeditiously as practicable. The records shall include, at a minimum, the date that each complaint was received and a description of the following: the complaint, the permittee's assessment of the validity of the complaint, any corrective action taken, and the date the corrective action was taken.

Visible Emissions

2.7 The permittee shall not discharge any air pollutant to the atmosphere from any point of emission for a period or periods aggregating more than three minutes in any 60-minute period which is greater than 20% opacity as determined by procedures contained in IDAPA 58.01.01.625. These provisions shall not apply when the presence of uncombined water, NO_x, and/or chlorine gas is the only reason for the failure of the emission to comply with the requirements of this section.

2.8 Each month that the facility is operated, the permittee shall conduct a facility-wide inspection of potential sources of visible emissions, during daylight hours and under normal operating conditions. Sources that are monitored using a continuous opacity monitoring system (COMS) are not required to comply with this permit condition. The inspection shall consist of a see/no see evaluation for each potential source of visible emissions. If any visible emissions are present from any point of emission, the permittee shall either

a) take appropriate corrective action as expeditiously as practicable to eliminate the visible emissions. Within 24 hours of the initial see/no see evaluation and after the corrective action, the permittee shall conduct a see/no see evaluation of the emissions point in question. If the visible emissions are not eliminated, the permittee shall comply with b).

or

b) perform a Method 9 opacity test in accordance with the procedures outlined in IDAPA 58.01.01.625. A minimum of 30 observations shall be recorded when conducting the opacity test. If opacity is greater than 20%, as measured using Method 9, for a period or periods aggregating more than three minutes in any 60-minute period, the permittee shall take all necessary corrective action and report the exceedance in its annual compliance certification and in accordance with IDAPA 58.01.01.130-136.

The permittee shall maintain records of the results of each visible emission inspection and each opacity test when conducted. The records shall include, at a minimum, the date and results of each inspection and test and a description of the following: the permittee's assessment of the conditions existing at the time visible emissions are present (if observed), any corrective action taken in response to the visible emissions, and the date corrective action was taken.

[12/17/08]

Open Burning

2.9 The permittee shall comply with the requirements of the Rules for Control of Open Burning, IDAPA58.01.01.600-623.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-2008.0156

Permittee: Challis Redi-Mix

Location: Challis, Idaho

Facility ID No. 037-00008

Reports and Certifications

- 2.10 Any reporting required by this permit, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, notifications of intent to test, testing reports, or compliance certifications, shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete. Any reporting required by this permit shall be submitted to the following address:

Air Quality Permit Compliance
Department of Environmental Quality
Idaho Falls Regional Office
900 N. Skyline, Suite B
Idaho Falls, ID 83402

Phone: (208) 528-2650
Fax: (208) 528-2695

Obligation to Comply

- 2.11 Receiving a Tier II operating permit shall not relieve any owner or operator of the responsibility to comply with all applicable local, state, and federal rules and regulations.

Fuel-burning Equipment

- 2.12 The permittee shall not discharge to the atmosphere from any fuel-burning equipment PM in excess of 0.015 gr/dscf of effluent gas corrected to 3% oxygen by volume for gas, 0.050 gr/dscf of effluent gas corrected to 3% oxygen by volume for liquid, 0.050 gr/dscf of effluent gas corrected to 8% oxygen by volume for coal, and 0.080 gr/dscf of effluent gas corrected to 8% oxygen by volume for wood products.

Sulfur Content

- 2.13 No person shall sell, distribute, use, or make available for use any distillate fuel oil containing more than the following percentages of sulfur:
- ASTM Grade 1 fuel oil - 0.3% by weight.
 - ASTM Grade 2 fuel oil - 0.5% by weight.
- 2.14 The permittee shall maintain documentation of supplier verification of distillate fuel oil sulfur content on an as-received basis.

3. CONCRETE BATCH PLANT, SCREENING OPERATION, AND GENERATORS

3.1 Process Description

Challis Redi-Mix is a truck mix concrete batch plant consisting of aggregate storage bins and stockpiles, a cement storage silo, a weigh batcher, and conveyors. The facility combines sand, gravel, and cement, and transfers the mixture into a truck along with a measured amount of water for in-transit mixing of the concrete. The facility also has an aggregate screening operation and washing operation for processing of gravel used in the concrete batch plant or sold directly to the public. Power will be supplied to the concrete batch plant from the local power grid. Power will be supplied to the screening and washing operations from diesel-fired generators.

3.2 Emission Control Description

The particulate matter (PM) and particulate matter with an aerodynamic diameter less than or equal to ten microns (PM₁₀) emissions from the cement storage silo is controlled by a fabric sock. Table 3.1 below describes the control devices or measures associated with the concrete batch plant and screening and washing operations.

Table 3.1 DESCRIPTION OF THE CONCRETE BATCH PLANT, SCREENING OPERATION, AND GENERATORS

Emissions Unit / Process	Emissions Control Device	Emissions Point
Cement storage silo	Cement storage silo fabric sock Manufacturer: Dickle Equip Model: unknown Estimated control efficiency: 75%	Cement storage silo stack Exit height: 42 ft Exit diameter: 0.33 ft Exit air flow rate: <10,000 acfm
Weigh batcher	None	Weigh batcher stack
Generators		
(screening operation) Manufacturer: Lister genset Model: 4101040TX3A001 Maximum capacity: 10 HP Maximum production: 4,500 hr/yr	None	Lister generator stack Exit height: unknown Exit diameter: unknown Exit air flow rate: unknown
(washing operation) Manufacturer: Caterpillar Model: 3304 genset Maximum capacity: 125 kW Maximum production: 4,500 hr/yr Fuel: Diesel Fuel consumption: 9 gal/hr	None	Caterpillar generator stack Exit height: 3.0 ft Exit diameter: 0.33 ft Exit air flow rate: 1,000 acfm
Screening operation, truck loading, and materials transfer points (includes fugitives)	Water sprays or equivalent Estimated control efficiency: 75%	screening, aggregate dump to ground, sand dump to ground, aggregate dump to conveyor, sand dump to conveyor, aggregate conveyor to elevator storage, and sand conveyor to elevated storage

Facility ID No. 037-00008

Emissions Limits

3.3 Emission Limits

The PM₁₀ and NO_x emissions from the concrete batch plant cement storage silo and the generators shall not exceed any corresponding emissions rate limits listed in Table 3.2.

Table 3.2 CONCRETE BATCH PLANT AND GENERATORS EMISSIONS LIMITS¹

Source Description	PM ₁₀ ²	NO _x
	lb/day ³	T/yr ⁴
Cement storage silo	11.76	
Generators, 125 kW and 10 HP		12.85

- 1) In absence of any other credible evidence, compliance is assured by complying with this permit's operating, monitoring and record keeping requirements.
- 2) Particulate matter with an aerodynamic diameter less than or equal to a nominal ten (10) micrometers, including condensable particulate as defined in IDAPA 58.01.01.006.81.
- 3) Pounds per day as determined by a test method prescribed by IDAPA 58.01.01.157 or DEQ approved alternative.
- 4) Tons per consecutive 12-calendar month period.

3.4 Fugitive Emissions

Fugitive emissions shall not be observed leaving the property boundary for a period or periods aggregating more than three minutes in any 60-minute period. Visible emissions shall be determined by Method 22, as described in 40 CFR 60, Appendix A, or a DEQ approved alternative.

Operating Requirements

3.5 Cement Usage Limit

The total cement transferred to the cement storage silo shall not exceed 84,000 pounds per day.

3.6 Generators Operating Hours Limits

Generator operation shall not exceed 4,500 hours in any consecutive 12-calendar month period.

3.7 Operations and Maintenance (O&M) Manual

3.7.1 The permittee shall maintain and comply with an operations and maintenance (O&M) manual for the fabric filter, which describes the procedures that shall be followed to comply with General Provision 2 and the fabric filter requirements contained in this permit. The manual shall remain onsite at all times and shall be made available to DEQ representatives upon request.

3.7.2 The list of operation and maintenance procedures developed shall become a part of this permit by reference, and the permittee shall adhere to all of the operation and maintenance procedures contained therein.

3.8 Cement Storage Silo Fabric Sock

The permittee shall install, calibrate, maintain, and operate the fabric filter in accordance with manufacturer's specifications.

Permittee: Challis Redi-Mix

Location: Challis, Idaho

Facility ID No. 037-00008

Monitoring and Recordkeeping Requirements

3.9 Cement Usage Monitoring

The number of pounds of cement transferred to the cement storage silo per day shall be recorded. Records of this information shall be maintained in accordance with General Provision 7.

3.10 Generators Operating Hours Monitoring

The number of hours of generator operation per month shall be recorded for each generator. Records of this information shall be maintained in accordance with General Provision 7.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-2008.0156

Permittee:	Challis Redi-Mix	Facility ID No. 037-00008
Location:	Challis, Idaho	

4. SUMMARY OF EMISSION RATE LIMITS

Table 4.1 provides a summary of all emission rate limits required by this permit.

Table 4.1 SUMMARY OF EMISSION RATE LIMITS

Emission Limits^a – Daily (lb/day), and Annual^b (T/yr)		
Source Description	PM₁₀^c	NO_x
	lb/day	T/yr
Cement storage silo	11.76	
Generators, 125 kW and 10 HP		12.85

^a As determined by a pollutant-specific EPA reference method, a DEQ-approved alternative, or as determined by DEQ's emissions estimation methods used in this permit analysis.

^b As determined by multiplying the actual or allowable (if actual is not available) pound per hour emission rate by the allowable hours per year that the process(es) may operate(s), or by actual annual production rates.

^c Includes condensables

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-2008.0156

Permittee: Challis Redi-Mix

Location: Challis, Idaho

Facility ID No. 037-00008

5. TIER II PERMIT TO OPERATE GENERAL PROVISIONS

General Compliance

1. The permittee has a continuing duty to comply with all terms and conditions of this permit. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the Rules for the Control of Air Pollution in Idaho. The emissions of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code §39-101, et seq.

[Idaho Code §39-101, et seq.]
2. The permittee shall at all times (except as provided in the Rules for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.

[IDAPA 58.01.01.211, 5/1/94]
3. Nothing in this permit is intended to relieve or exempt the permittee from the responsibility to comply with all applicable local, state, or federal statutes, rules and regulations.

[IDAPA 58.01.01.212.01, 5/1/94]

Inspection and Entry

4. Upon presentation of credentials, the permittee shall allow DEQ or an authorized representative of DEQ to do the following:
 - a. Enter upon the permittee's premises where an emissions source is located or emissions related activity is conducted, or where records are kept under conditions of this permit;
 - b. Have access to and copy, at reasonable times, any records that are kept under the conditions of this permit;
 - c. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit; and
 - d. As authorized by the Idaho Environmental Protection and Health Act, sample or monitor, at reasonable times, substances or parameters for the purpose of determining or ensuring compliance with this permit or applicable requirements.

[Idaho Code §39-108]

Construction and Operation Notification

5. The permittee shall furnish DEQ written notifications as follows in accordance with IDAPA 58.01.01.211:
 - a. A notification of the date of initiation of construction, within five working days after occurrence;
 - b. A notification of the date of any suspension of construction, if such suspension lasts for one year or more;
 - c. A notification of the anticipated date of initial start-up of the stationary source or facility not more than sixty days or less than thirty days prior to such date;

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-2008.0156

Permittee:	Challis Redi-Mix	Facility ID No. 037-00008
Location:	Challis, Idaho	

- d. A notification of the actual date of initial start-up of the stationary source or facility within fifteen days after such date; and
- e. A notification of the initial date of achieving the maximum production rate, within five working days after occurrence - production rate and date.

[IDAPA 58.01.01.211, 5/1/94]

Performance Testing

- 6. If performance testing (air emissions source test) is required by this permit, the permittee shall provide notice of intent to test to DEQ at least 15 days prior to the scheduled test date or shorter time period as approved by DEQ. DEQ may, at its option, have an observer present at any emissions tests conducted on a source. DEQ requests that such testing not be performed on weekends or state holidays.

All performance testing shall be conducted in accordance with the procedures in IDAPA 58.01.01.157. Without prior DEQ approval, any alternative testing is conducted solely at the permittee's risk. If the permittee fails to obtain prior written approval by DEQ for any testing deviations, DEQ may determine that the testing does not satisfy the testing requirements. Therefore, at least 30 days prior to conducting any performance test, the permittee is encouraged to submit a performance test protocol to DEQ for approval. The written protocol shall include a description of the test method(s) to be used, an explanation of any or unusual circumstances regarding the proposed test, and the proposed test schedule for conducting and reporting the test.

Within 30 days following the date in which a performance test required by this permit is concluded, the permittee shall submit to DEQ a performance test report. The written report shall include a description of the process, identification of the test method(s) used, equipment used, all process operating data collected during the test period, and test results, as well as raw test data and associated documentation, including any approved test protocol.

[IDAPA 58.01.01.157, 4/5/00]

Monitoring and Recordkeeping

- 7. The permittee shall maintain sufficient records to ensure compliance with all of the terms and conditions of this permit. Records of monitoring information shall include, but not be limited to the following: (a) the date, place, and times of sampling or measurements; (b) the date analyses were performed; (c) the company or entity that performed the analyses; (d) the analytical techniques or methods used; (e) the results of such analyses; and (f) the operating conditions existing at the time of sampling or measurement. All monitoring records and support information shall be retained for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Supporting information includes, but is not limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by this permit. All records required to be maintained by this permit shall be made available in either hard copy or electronic format to DEQ representatives upon request.

[IDAPA 58.01.01.211, 5/1/94]

Excess Emissions

- 8. The permittee shall comply with the procedures and requirements of IDAPA 58.01.01.130-136 for excess emissions due to startup, shutdown, scheduled maintenance, safety measures, upsets and breakdowns.

[IDAPA 58.01.01.130-136, 4/5/00]

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-2008.0156

Permittee: Challis Redi-Mix

Location: Challis, Idaho

Facility ID No. 037-00008

Certification

9. All documents submitted to DEQ, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certification shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.

[IDAPA 58.01.01.123, 5/1/94]

False Statements

10. No person shall knowingly make any false statement, representation, or certification in any form, notice, or report required under this permit, or any applicable rule or order in force pursuant thereto.

[IDAPA 58.01.01.125, 3/23/98]

Tampering

11. No person shall knowingly render inaccurate any monitoring device or method required under this permit or any applicable rule or order in force pursuant thereto.

[IDAPA 58.01.01.126, 3/23/98]

Transferability

12. This permit is transferable in accordance with procedures listed in IDAPA 58.01.01.209.06.

[IDAPA 58.01.01.209.06, 4/11/06]

Severability

13. The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

[IDAPA 58.01.01.322.15.h, 5/1/94; 40 CFR 70.6(a)(5)]
