INTRODUCTION

The surficial geologic map of the Hayden Lake quadrangle, Kootenai County, Idaho, 1:24,000, was compiled during 1998 and 1999 by the Idaho Department of Lands and the Idaho Geological Survey. The map area is located between the Coeur d'Alene Mountains and the Rathdrum Prairie. The map represents the geology of the materials and soils exposed near the surface. Elevations range from over 4,320 feet at the top of Hollister Mountain to 2,238 feet on the west side of Hayden Lake. The Hayden Lake embayment was marginal to the main outburst channel and was inundated as high as 2,600 feet in a large eddy. The map was produced in cooperation with the U.S. Department of Agriculture Soil Conservation Service, 255 p.
