

EPA BROWNFIELDS GRANT TECHNICAL ASSISTANCE WORKSHOP

BOISE AND LEWISTON, ID

This workshop highlights best practices and strategies for competitive EPA brownfield grant applications and IDEQ assistance, as well as other funding sources for reuse of properties. This free, half day, workshop is provided in collaboration with the Idaho Department of Environmental Quality and will highlight the best practices and strategies for competitive EPA brownfield grant applications and IDEQ assistance, as well as other funding sources for reuse of properties. Designed to meet the needs of grant applicants involved in redeveloping environmentally impacted properties, this workshop program is one of our most popular. By limiting class size, trainings are ideal for those interested in direct counsel from the workshop speakers.

Who Should Attend?

- Local Governments
- Economic & Community Development Departments
- Councils of Government
- Nonprofits
- ***Note:** The information presented in this workshop is intended for representatives of NGO's, Non-profits, and government entities.

Curriculum- Boise

Recycling abandoned and under-utilized properties requires knowledge and skills to manage contaminant issues. A practical and interactive workshop, the curriculum will instruct attendees on how and where to obtain funding and manage projects to redevelop previously-used sites, into housing, parks, trails, and job-creating businesses. The agenda contains sessions on the following topics, presented by experts from CCLR and the Idaho Department of Environmental Quality:

- EPA and other federal resources for economic development, and redevelopment
- Strategies for competitive EPA grant applications
- Case study discussions
- Interactive Q & A session

Fees and Scholarships

This workshop is FREE. A light breakfast and lunch will be provided.
