Idaho Department of Environmental Quality
Reuse Permit
I-050-03: Modification 2

Permittee Name: The Amalgamated Sugar Company LLC (TASCO), Mini-Cassia Facility

Effective Date of Modification: July 7, 2017

Complete Description of Modification:

1. Section 3 of the reuse permit lists compliance activities required to be completed by the permittee. Four (4) new compliance activities associated with the addition of management units MU-05013 and MU-05014 have been added to this section.

3. Compliance Schedule for Required Activities

<table>
<thead>
<tr>
<th>Compliance Activity (CA) Number and Completion Due Date</th>
<th>Compliance Activity Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CA-050-09 Prior to application of recycled water</td>
<td>Plans and specifications: The permittee shall submit to DEQ for review and approval, plans and specifications for all new and existing infrastructure that will be used for land applying recycled water to management units MU-05013 and MU-05014.</td>
</tr>
<tr>
<td>CA-050-10 May 7, 2018</td>
<td>Well Location Acceptability Analysis (WLAA): The permittee shall submit to DEQ for review and approval, an updated WLAA to reflect recycled water application to management units MU-05013 and MU-05014. The methodology described in Section 6.6.4 of the DEQ Guidance for Reclamation and Reuse of Municipal and Industrial Wastewater shall be used to conduct the WLAA.</td>
</tr>
<tr>
<td>CA-050-11 October 7, 2017</td>
<td>Supplemental Irrigation Water Measurement: The permittee shall submit to DEQ for review and approval, a plan for the measurement of supplemental irrigation water applied to management units MU-05013 and MU-05014. If flow meters are specified, plans and specifications shall be submitted to DEQ for review and approval.</td>
</tr>
<tr>
<td>CA-050-12 Plan due September 7, 2017</td>
<td>Aquifer Properties Characterization: The permittee shall submit to DEQ for review and approval, a plan for characterizing aquifer properties (hydraulic conductivity, effective porosity, and gradient) associated with management units MU-05013 and MU-05014. Effective porosity may be obtained from standard tables. If pump testing is specified, the testing shall be conducted at least once in October 2017 and April 2018 to determine aquifer properties at high and low ground water level conditions. An aquifer properties characterization report shall be submitted to DEQ for review and approval by June 1, 2018.</td>
</tr>
<tr>
<td>Report due June 1, 2018</td>
<td></td>
</tr>
</tbody>
</table>
2. Section 4 of the reuse permit now specifies management units MU-05013 and MU-05014 as permitted management units approved for the land application of recycled water. The following subsections have been updated to include the addition of the new management units: 4.1 specifies management unit descriptions, 4.2 specifies growing season and non-growing season hydraulic loading limits, and 4.3 specifies constituent loading limits. The description of management unit MU-05012 has also been updated in section 4.1 to reflect the separation of the East PCC Storage Areas Phase 1 and Phase 2.

### 4.1. Hydraulic Management Unit Descriptions

<table>
<thead>
<tr>
<th>Serial Number</th>
<th>Description</th>
<th>Type of Recycled Water Allowed</th>
<th>Irrigation System Type</th>
<th>Maximum Acres Allowed</th>
</tr>
</thead>
<tbody>
<tr>
<td>MU-05012⁵</td>
<td>East PCC Storage Area, Phase 1</td>
<td>Process and condensate wastewater</td>
<td>Hand lines</td>
<td>14.7</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>MU-05013</td>
<td>East PCC Storage Area, Phase 2</td>
<td>Process and condensate wastewater</td>
<td>Hand/wheel lines</td>
<td>18.7</td>
</tr>
<tr>
<td>MU-05014</td>
<td>South Suchan</td>
<td>Process and condensate wastewater</td>
<td>Hand/wheel lines</td>
<td>102.4</td>
</tr>
</tbody>
</table>

b. Prior to any recycled water application to MU-05012, a minimum depth of three (3) feet of precipitated calcium carbonate (PCC) material shall be deposited and compacted over the entire permitted acreage.
4.2. Hydraulic Loading Limits, Vegetation, and Grazing\textsuperscript{a}

<table>
<thead>
<tr>
<th>Serial Number</th>
<th>Growing Season Hydraulic Loading</th>
<th>Non-growing Season Maximum Hydraulic Loading, inches</th>
</tr>
</thead>
<tbody>
<tr>
<td>MU-05013</td>
<td>Substantially at the irrigation water requirement (IWR)\textsuperscript{b}</td>
<td>7.3</td>
</tr>
<tr>
<td>MU-05014</td>
<td>Substantially at the IWR\textsuperscript{b}</td>
<td>6.5</td>
</tr>
</tbody>
</table>

\textsuperscript{a} No limits on type of vegetation grown. No grazing is currently allowed. A DEQ-approved grazing management plan is required prior to grazing.

\textsuperscript{b} For compliance purposes, the source of P\textsubscript{def} data used to calculate the IWR shall be specified in the PO.

4.3. Constituent Loading Limits

<table>
<thead>
<tr>
<th>Serial Number</th>
<th>Constituent Loading (from all sources)\textsuperscript{a}</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Nitrogen</td>
</tr>
<tr>
<td>MU-05013</td>
<td>150% of typical crop uptake\textsuperscript{c}</td>
</tr>
<tr>
<td>MU-05014</td>
<td>150% of typical crop uptake\textsuperscript{c}</td>
</tr>
</tbody>
</table>

\textsuperscript{a} Includes waste solids, fertilizer, soil amendments, and any other material that would add to the constituent application amount.

\textsuperscript{b} Limit is based upon loading rates contributed by process and condensate wastewater only.

\textsuperscript{c} Typical crop uptake is the median constituent crop uptake from the 3 most recent years the crop has been grown. For crops having less than 3 years of on-site crop uptake data, regional crop yield data and typical nutrient content values, or other values approved by DEQ, may be used.

3. Section 5 of the reuse permit now lists all required monitoring associated with the addition of management units MU-05013 and MU-05014. Section 5.1.2 has been updated to require the flow monitoring of all recycled water and supplemental irrigation water applied to the new management units. Section 5.2.1 has been updated to include ground water monitoring wells GW-05071 (MW-122) and GW-05072 (MW-123) that were installed to assist in monitoring ground water quality upgradient and downgradient of the new management units. Section 5.2.2 has been updated to include the ground water monitoring requirements of monitoring wells associated with the new management units. Section 3.5 and section 5.4 now specify soil and plant tissue monitoring for the new management units, respectively.
5.1.2 Management Unit and Other Flow Monitoring

<table>
<thead>
<tr>
<th>Management Unit or Flow Measurement Serial Number and Location</th>
<th>Sample Description</th>
<th>Sample Type and Frequency</th>
<th>Measured Parameters, each MU or FM</th>
</tr>
</thead>
<tbody>
<tr>
<td>MU-05013 MU-05014</td>
<td>Process wastewater volume to each specified management unit</td>
<td>- Daily meter reading(s) as needed to calculate volume to each MU</td>
<td>- MG/month - Inches/month - MG/growing season - Inches/growing season - MG/non-growing season - Inches/non-growing season</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Monthly compilation of data to report monthly volume to each MU</td>
<td></td>
</tr>
<tr>
<td>MU-05013 MU-05014</td>
<td>Condensate wastewater volume to each specified management unit</td>
<td>- Daily meter reading(s) as needed to calculate volume to each MU</td>
<td>- MG/month - Inches/month - MG/growing season - Inches/growing season - MG/non-growing season - Inches/non-growing season</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Monthly compilation of data to report monthly volume to each MU</td>
<td></td>
</tr>
<tr>
<td>MU-05013 MU-05014</td>
<td>Supplemental irrigation water volume to each specified management unit</td>
<td>- Daily meter reading(s) as needed to calculate volume to each MU</td>
<td>- MG/month - Inches/month - MG/growing season - Inches/growing season</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Monthly compilation of data to report monthly volume to each MU</td>
<td></td>
</tr>
</tbody>
</table>

5.2 Ground Water Monitoring

5.2.1 Ground Water Monitoring Point Descriptions

<table>
<thead>
<tr>
<th>Monitoring Point Serial Number</th>
<th>Common Designation</th>

<td></td>
<td></td>
<td>- Plant available phosphorus</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>- pH (standard units)</td>
</tr>
</tbody>
</table>

a. The number of sample locations specified in the PO or QAPP for each SU shall be sampled. At each location, samples shall be obtained from three depths: 0-12 inches, 12-24 inches, and 24-36 inches or refusal. The samples obtained from each depth shall be composited by depth and yield three composite samples for each soil monitoring unit; one composite sample for each depth.

c. Soil samples shall be collected prior to the application of recycled water to MU-05013 and MU-05014.

5.4 Plant Tissue Monitoring

<table>
<thead>
<tr>
<th>Associated Hydraulic Management Units</th>
<th>Sample Type</th>
<th>Sample Frequency</th>
<th>Reporting Parameters&lt;sup&gt;a&lt;/sup&gt;</th>
</tr>
</thead>
<tbody>
<tr>
<td>MU-05013</td>

<td></td>
<td></td>
<td>- NO&lt;sub&gt;3&lt;/sub&gt;-N+NO&lt;sub&gt;2&lt;/sub&gt;-N (ppm)</td>
</tr>
</tbody>
</table>

a. For each harvest, report the following for each management unit: sample collection date, crop type, harvested portion, and reporting parameters in the table above.

4. Section 6.1.2, item 9 of the reuse permit has been updated to include the reporting requirements for MU-05013 and MU-05014 that must be submitted with the annual report.

6.1.2 Required Contents

The Annual Report shall include the following:

9. The parameters in the following table:
<table>
<thead>
<tr>
<th>Monitoring Point Serial Number</th>

</tbody>
</table>
5. This modification removes dissolved oxygen from the constituents required to be monitored in ground water samples listed in section 5.2.2 of the permit.

6. This modification removes ground water monitoring wells GW-05026 (MW-A), GW-05046 (MW-102), and GW-05062 (MW-105) from section 5.1.2 of the permit.

7. This modification removes the Fly Ash Pond (LG-05004) from section 5.5 of the permit.

8. The facility map located in section 11.1 of the reuse permit has been updated to include management units MU-05013 and MU-05014, the changes to the ground water monitoring well network, and the removal of lagoon LG-05004. The updated facility map is attached to this modification.

The modifications described above in this Modification 2 are hereby approved. This modification to the permit is incorporated into and constitutes as part of Reuse Permit I-050-03. The modified permit is incomplete and unlawful under IDAPA 58.01.17 Recycled Water Rules without this modification attached.
