

Registration FAQs:

- **Is this the 2019 Water Reuse Conference? Is this the same Water Reuse Conference that I went to in 2015 and/or 2017 in Boise?**
 - Yes! This is the same Water Reuse Conference you know and love. This year we are teaming up with the Idaho Region of PNCWA to maximize learning opportunities for attendees. IROC is the combined Idaho Operators Conference AND the Water Reuse Conference.
- **Can I register a group all at once?**
 - Yes! If you need to register two or more people at once and/or need an invoice generated, please contact Brenda Valverde. Brenda.Valverde@deg.idaho.gov
- **Why does it say “Attend Any Session” so many times?**
 - During the conference, we will have up to four educational tracks that are going on at the same time. These educational tracks will be held in different meeting rooms and are scheduled to break about the same time so that you have time to attend other classes. This gives the attendees more options to learn what they want to learn and maximize their training experience.
- **How do I find out more about the tours being offered?**
 - Below in *Tour Information*, you will find out more about the tours we have scheduled.
 - We will send you a personalized email in April with details of your tour.
 - If you have any questions about the tours, please contact Shilynn Novak.
Shilynn.Novak@deg.idaho.gov
208-373-0156
- **Why won't the page take my registration information?**
 - On the top of the registration information box, it should tell you what was not accepted.
 - Check zip code, phone number, email address, etc.
- **Why isn't my phone number being accepted?**
 - When registering, your phone number needs a dash between numbers.
 - For example: 208-123-1234
- **When am I expected to pay?**
 - When you finish online registration, you will have the option of paying by credit card or electronic check.
 - Separate invoices will be sent by email for the golf event, tours, Tuesday banquet, and t-shirt purchase following online registration.
- **Is there a discount for staying at the Riverside Hotel while I'm at the conference?**
 - Yes! Guests may call 208-343-1871 and ask for the IROC group rate when they are ready to book a room. There are a limited number of blocked rooms and are filled on a first-come, first-served basis.
 - Rooms must be reserved by Monday, April 29, 2019 to secure the special conference room rate.
- **How do I know what t-shirt size to get?**
 - Take a look at the size chart in *T-Shirt Information* (below) to find out what t-shirt size would be best.
- **I cannot find my question on the FAQs. Who do I contact?**
 - If you have questions, please contact Brenda Valverde at Brenda.Valverde@deg.idaho.gov or Tressa Nicholas at Tressa.Nicholas@deg.idaho.gov or Shilynn Novak at Shilynn.Novak@deg.idaho.gov

*Tour Information:***CS Beef Packers, LLC***17365 S Cole Rd, Kuna, ID 83634*

CS Beef Packers, LLC began in 2015 as a partnership between Caviness Beef Packers and J.R. Simplot Company. CS Beef currently has an industrial reuse permit where they currently treat and reuse water from meat processing and meat rendering from the facility. Treatment includes screening, an anaerobic lagoon, an aerobic lagoon, and settling/storage lagoons. Reuse application includes slow rate land application during the growing and non-growing season. The tour will be about 1 hour and will include a view of some of the in-house meat processing, a visit to the reuse land application site, and discussion of the drinking water and wastewater treatment system.

*Tour leaves Riverside at 1:30pm on Tuesday, May 21, 2019 and expects to return about 4:00pm***Twenty Mile South Farm***9600 Nicholson Rd, Kuna, ID 83634*

Twenty Mile South Farm (TMSF) is a 4,225 acre farm that is owned and operated by the City of Boise. This farm receives Class B biosolids from Lander Street and West Boise Water Renewal Facilities to be stored and applied to farm soils as a fertilizer to produce crops. Each facility treats used water from domestic and industrial sources. The three main crops (corn, alfalfa, and winter wheat) are harvested and then sold to local farmers. In 2014, TMSF was awarded by the Northwest Biosolids and the Pacific Northwest Clean Water Association the Excellence in Biosolids Management Award. TMSF has also recently constructed a new office and maintenance facility that is Idaho's first zero-net energy facility. The tour will be about 90 minutes and you will see how the City of Boise sustainably manages 30,000 wet tons of biosolids per year including transportation, storage, application, and the process of operating the largest contiguous farm in Ada County, Idaho.

*Tour leaves Riverside at 1:30pm on Tuesday, May 21, 2019 and expects to return about 4:30pm***Lander Street Water Renewal Facility***790 Lander St, Boise, ID 83703*

Lander Street Water Renewal Facility (WRF) was built in 1948 and has expanded to meet the city of Boise's needs since. Currently, the WRF treats on average about 10-12 MGD and treats domestic and industrial wastewater. This WRF produces Class B sludge that is transferred to West Boise WRF where it is dewatered and sent to Twenty Mile South Farm (TMSF). TMSF then applies the biosolids to foraging crops and sells the crops to local farmers. The tour will be about 90 minutes and you will see one of the first activated sludge plants in the northwest, original methane driven engine pumps, inline activated primary fermenters, innovative EBNR step feed aeration basins, secondary clarification, UV disinfection, and daily process monitoring lab testing.

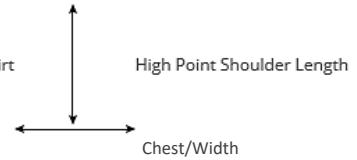

Tour is 3:00pm-4:30pm at the Lander Street WRF on Wednesday, May 22, 2019

T-shirt Information:

Men's CVC Crew

High Point Shoulder (HPS) is measured from the highest point of the shoulder to the bottom hem of the shirt

Chest/Width measures across the bust 1" below the armhole, seam to seam.
