

Volume 3: Low-Impact Development Techniques

Section 1:	Introduction.....	1
	1.1 Organization.....	2
	1.2 Updates.....	3
Section 2:	Natural Drainage Systems Design.....	4
	2.1 Low-Impact Development.....	5
	2.2 Expanding the Solutions Palette.....	8
	BMP 1: Reduced Clearing and Grading.....	13
	BMP 2: Functional Grading.....	14
	BMP 3: Site Fingerprinting.....	16
	BMP 4: Protect Natural Site Functions.....	17
	BMP 5: Preserve Natural Corridors.....	20
	BMP 6: Aquatic Buffers.....	22
	BMP 7: Fit Development to Natural Gradient.....	24
	BMP 8: Locate Impervious Surfaces to Drain to Natural Systems.....	25
	BMP 9: Minimize Directly Connected Impervious Areas...	26
	BMP 10: Break Up Flow Directions From Paved Surfaces..	28
	BMP 11: Use Alternative Surfaces.....	29
	BMP 12: Trail and Path Network.....	31
	BMP 13: Alternative Development Configurations.....	33
	BMP 14: Define Development Envelope.....	36
	BMP 15: Identify Sensitive Areas.....	37
	BMP 16: Alternative Lot Configuration.....	39
	BMP 17: Water Harvesting and Reuse.....	40
	BMP 18: Green Roofs.....	43
	BMP 19: Narrow Roadways.....	46
	BMP 20: Reconfigure Driveways.....	48
	BMP 21: Alternative Turnarounds.....	50
	BMP 22: Reduced Sidewalk Application.....	52
	BMP 23: Green Parking Lots.....	53
	BMP 24: Bioretention.....	55
	BMP 25: Soil Amendments.....	57
	BMP 26: Soil Restoration.....	58
	BMP 27: Created Wetlands.....	60
	BMP 28: Stormwater Planters.....	62
	BMP 29: Vegetation Restoration.....	63
	BMP 30: Urban Forestry.....	65
	BMP 31: Alternative Street Layouts.....	67
	BMP 32: Parking Lot and Street Storage.....	68
	BMP 33: Biofiltration.....	70
	BMP 34: Eliminate Curb and Gutter.....	73

BMP 35: Conveyance Furrows..... 75
BMP 36: Dispersal Trench..... 77
BMP 37: Pop-Up Emitter.....78
