

A Colorado Perspective: Denver Water's Recycled Water Program

Abstract: Learn about the Use of Recycled Water in Colorado, and particularly in Denver Water's System. This presentation will highlight some innovative and out of the box uses of recycled water, including the use of recycled water by the Denver Zoo, in their animal habitats, and the Denver Museum of Nature and Science's non consumptive use of recycled water to provide heating and cooling to the new wing of the museum.

Presenter: Jenny Murray

Title: Recycled Water Program Manager
Organization: Denver Water
Address: <http://www.denverwater.org/>

Professional Background: Jenny Murray is the Recycled Water Program Manager for Denver Water. Prior to working for Denver Water she spent over 10 years managing a recycled water system for another Colorado utility. She has B.S. degrees in Water Resources and Watershed Science. She has been involved with a variety of recycled water stakeholder groups, and served on the Board of Directors for the WaterReuse Association, an international organization that advocates for “the right water for the right use” and whose mission it is “to advance the beneficial and efficient uses of high-quality, locally produced, sustainable water sources.”
