**TRAINING PROGRAMS AND RESPONSIBILITY**

## TRAINING PROGRAMS AND RESPONSIBILITY

Wabtec-MotivePower Facility  
U.S. EPA ID No.: IDD980976831  
Boise, Idaho

An environmental health and safety (EHS) technician will be employed or contracted by Wabtec Corporation's MotivePower Facility (MP) who will be responsible for MP post-closure activities and Resource Conservation and Recovery Act (RCRA) Part B Permit compliance. A copy of the Part B Permit will also be maintained at the MP facility. Job requirements for the technician are as follows:

- Trained in appropriate quality assurance/quality control (QA/QC) procedures for waste sampling.
- Completed OSHA 29 CFR 1910.120 hazardous waste safety training. High school graduate.
- Trained in the use and decontamination of various types of sampling equipment.
- Familiar with federal, state, and local waste management legislation and compliance requirements.

Annual environmental and safety training updates will be provided for the technician with appropriate documentation of participation and satisfactory completion. In addition, the technician will be required to attend a minimum of one short course, seminar, or similar training program on a biennial basis to remain current in sampling equipment, methodologies and procedures, as well as changes in regulatory compliance requirements.

The technician will be responsible to the Plant Manager or any other person who performs similar policy or decision making functions at the MP Facility. Specifically, the technician will be responsible for the inspection and maintenance of all structures regulated by MP Part B Permit, in accordance with procedures specified in the Permit. He/she shall be responsible for documentation of all inspections performed, providing written documentation to the Safety Supervisor and environmental personnel of any noncompliance issues identified during inspection requiring maintenance or corrective action; providing supervision and documentation of maintenance activities performed; and assuring that maintenance activities are conducted in accordance with appropriate QA/QC and health/safety procedures. The technician will be responsible for post-closure groundwater monitoring; maintenance and inspection of the monitoring network; maintenance and decontamination of sampling, equipment; calibration and operation of field instruments; maintenance and inspection of any equipment utilized for groundwater recovery; compliance with effluent discharge limitations for groundwater recovery; and appropriate disposal of any wastes generated during groundwater sampling and recovery. The technician shall also, be responsible for the upkeep of RCRA records and documentation, as well as RCRA reporting requirements.

In addition, two MP employees will be trained by the technician in RCRA compliance activities, to serve as alternates for performing technician duties in the event that he/she is temporarily unavailable to do the required tasks.

MP will retain a professional registered hydrogeologist and/or engineer to assist in the operation of the groundwater treatment plant and performance of groundwater monitoring system. The consultant shall also review and evaluate groundwater monitoring, corrective action, and report results of findings in accordance with the permit requirements.
