RE: Facility ID No. 077-00035, Magnida – Magnolia Nitrogen Idaho, American Falls
Completeness Review of PTC Application

Dear Mr. Raman

On November 1, 2013 the Department of Environmental Quality received an updated permit to construct application from Magnida for the fertilizer plant proposed to be located near American Falls. The application materials have been reviewed, and the application determined complete. Therefore, DEQ will proceed with the processing of this permit application in accordance with IDAPA 58.01.01.200, Rules for the Control of Air Pollution in Idaho (Rules).

Although the application has been declared complete, it may be necessary to request additional information to complete our review. Requested information must be submitted as provided in IDAPA 58.01.01.202.03 (Rules), or the application may be denied.

The permit evaluation phase may take up to 60 days, although the application will be processed as expeditiously as our resources allow. Please be aware that you may submit a written request to DEQ to provide a draft permit for review prior to issuance of a final permit in accordance with IDAPA 58.01.01.209.01.b.i (Rules). Additionally, a public comment period will be provided with an opportunity for a public hearing in accordance with IDAPA 58.01.01.209. (Rules). Because a comment period is required, at least 45 days will be added to the time needed to process your application.

If you have any questions about this letter or about the air quality permitting process, please contact me at (208) 373-0502 or daniel.pitman@deq.idaho.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Pitman".
