

2017 BURP Sites in North Fork Coeur d'Alene River Subbasin

Bioassessment data were collected at four sites in the North Fork Coeur d'Alene River Subbasin in 2017:

2017SCDAA001 Independence Creek: This Assessment Unit (AU) was listed as Not Assessed in the last Integrated Report.

2017SCDAA003 Shoshone Creek: This site was on Shoshone Creek upstream of Falls Creek. The AU is listed in the most recent Integrated Report as impaired by sediment and covered by the 2001 Sediment TMDL. The stream is a possible candidate for sediment delisting.

2017SCDAA004 Shoshone Creek: The site was on Shoshone Creek downstream of Falls Creek. As above, the AU is listed in the most recent Integrated Report as impaired by sediment and covered by the 2001 Sediment TMDL. The stream is a possible candidate for sediment delisting.

2017SCDAA005 Graham Creek: The site was on lower Graham Creek near the mouth. The stream is a reference trend site and is frequently monitored. It is also listed in the most recent Integrated Report as impaired by temperature and is covered by the 2013 Temperature TMDL. The stream is a possible candidate for temperature delisting.

Physical habitat data and pictures are available. Fisheries and macroinvertebrates data will be out in approx. 1 year.

The screenshot shows a web browser window with the URL <https://www2.deq.idaho.gov/water/BurpViewer/Menu>. The page title is "Sites". On the left, there is a list of 15 sites, each with a unique ID and name. The site "2017SCDAA010: SHIELDS GULCH CREEK" is highlighted in blue. On the right, there is a map of the North Fork Coeur d'Alene River Subbasin. The map shows the Coeur d'Alene National Forest and surrounding areas. Several green location pins are placed on the map, indicating the locations of the sites. The map includes a legend, a scale bar (10 km), and a "Map data ©2017 Google" notice.
