

For Mortgage Lenders Regarding Public Water Systems

DEQ receives frequent inquiries regarding the operating status or approval of public water systems for real estate transactions. To help us provide information as quickly as possible, please contact the regional office where the public water system is located: <https://www.deq.idaho.gov/regional-offices-issues/>. Identifying the public water system's name, which will typically be where the customer pays their water bill, will help us locate information for you.

General information about a public water system, including sample results and violations, can be located at: <http://dww.deq.idaho.gov/IDPDWW/>
